

Environmentally Preferred 2-2-2 MRSA System

2 Products

H₂Orange[®] 117 Multi-Purpose Cleaner-Sanitizer-Virucide-HBV:

- Cleans and sanitizes.
- Kills 99.9% of Influenza A2/Japan virus.*
- Prepares surfaces for additional disinfecting.

* Also kills 99.99% of Staphylococcus aureus (staph), Salmonella choleraesuis, Klebsiella pneumoniae, Pseudomonas aeruginosa, Streptococcus faecalis, and E-coli.

Critical Care[™] Disinfectant-Fungicide-Virucide:

- Kills MRSA in 2 minutes.
- Odorless, Ready-to-Use.
- 24-hour residual kill on common bacteria

2 Steps

Only a two-step procedure (clean first, then apply disinfectant) leaves no doubt as to the disinfectant's effectiveness.

One-step disinfectants require a custodian to judge if the surface's degree of organic soil is equal to or less than 5% blood serum, which is the EPA testing contamination threshold.

2 Minutes

Critical Care delivers a **fast two-minute kill on MRSA and VRE.****

** Vancomycin Resistant Enterococcus faecium.
See label for complete list of fungi, viruses, and bacteria.
