

Quality And Effectiveness Are In Easy Reach

You've put it off for days, maybe even weeks ... that long reach to dust the skylight in the conference room.

The prospect of climbing a ladder to reach it wouldn't seem as daunting if you had the right tools.

While dust may sound like a small maintenance matter, it can add up to some big labor costs and appearance issues.

The key is using products that quickly and effectively eliminate dust. Otherwise, you are wasting time and money.

Lambskin Specialties has spent over 60 years perfecting the manufacturing of quality products for cleaning and dusting, specializing in its line of Dust Wand® lambswool dusters, floor finish applicators and polishing bonnets.

Since Lambskin Specialties introduced the wool duster to the maintenance industry over 40 years ago, it has accumulated decades of experience in creating the highest quality dusting products.

The Dust Wand line has models designed to attack every dusting job from floor moldings to desktops and from high walls to sky-high light fixtures.

Line Variety

From the original Dust Wand to the recently unveiled MultiFlex Pad Holder, which is designed for cleaning difficult contoured surfaces such as bathtubs and Jacuzzis, Lambskin Specialties

offers more dusting and surface cleaning equipment solutions than you can shake a dust pom at.

There are dusters ranging from premium ostrich feathers to economy turkey feather dusters.

The super-sized Big Red, a 36-inch lambswool duster, is designed for restoration cleanup.

A full line of window washing cleaning tools is available, including microfiber window strip washers, natural and synthetic chamois, window squeegees and automotive windshield squeegees.

"Over the years, we have diversified our line of products to meet just about any dusting or flat surface cleaning need," points out Myron Schultz, director of sales and marketing for Lambskin Specialties.

"To give you an idea of how deep our product categories are, we have over 22 dusters in our feather duster line alone. Our commitment to our customers is to provide the right tools for their various needs," adds Schultz.

Attention To Quality

When you wrap your fingers around a Dust Wand handle, you immediately feel

the attention to quality.

The sturdy handle construction allows for long reaches with no bowing, cracking, breaking or sliding.

You'll also notice the quality of the dusting pom. There is a consistency in the length and density of the wool fibers to deliver more effective dust removal and a longer product life.

Lambskin Specialties applies the same quality in the manufacture of its WindowPro line of scrub sleeves and T-Bars. The sleeves are manufactured with a specially designed fabric — both standard and microfiber — and are built to last with the inside seams reinforced to prevent the T-Bar from breaking through.

And, speaking of T-Bars, each unit is designed to convert to a 6-inch T-Bar — that is two for the price of one!
