

Being on Lake Erie almost everyday from May to November with a boat full of customers takes it toll on my gear. Preventative maintenance is a constant and so is cleaning. Bait gets stepped on, food is ground into the floor, drinks are spilled... And that's only the interior. The outside takes an ever bigger beating. Scum lines, exhaust residue and road grit from towing show up daily. I was using a bottle of soft scrub a week to do my best to keep up....but since I switched to using W.O W.! Brand Marine Cleaners, , specifically, in my case, Ol' Blood-n-Gutz, on my polyethylene Triumph Boat looks like new after each cleaning. I spray it on and rinse it off and the grim is gone. If W .O .W! Brand Products Boat & Marine Cleaner works so well on my polyethylene boat, just think about what it will do for your fiberglass or aluminum boat!
