

HYCON TARGA

DESCRIPTION

HYCON TARGA (HT) is a specially designed, highly concentrated (up to 1:500), low foaming, fast drying, degreasing Floor Cleaner designed for automatic scrubber cleaning of vast production facilities, warehousing facilities, warehouse clubs, arenas, parking ramps, convention centers and exhibition halls, etc. HT can be used on concrete, wood, quarry tile, nylon block, steel, tile and linoleum. HT has been specially formulated to work in oil/water separators and in recycling systems of modern riding scrubbers. By ordering product 944, HT can be enhanced with a built-in shine polymer to deposit a non-oily shine to the floor surface. HT contains special drying agents that allow for surface drying to occur shortly after the rear squeegee has drawn up the remaining water. For street cleaning applications, dust control and particulate suspension is accomplished by our addition of a patent-pending grit-suspension ingredient called DETENTION.

DIRECTIONS

For exterior and interior commercial applications, use HT at up to a 1:500 dilution. Best results will be achieved using HT at concentrate dilution at temperatures above 65F. This is due to the fact that HT is 100% active with no water. Storage below 65F will cause HT to solidify. Soil conditions and square footage of facility to be cleaned will dictate use dilution:

Always sweep floor to remove large debris.

Light soil- dust, surface dirt Street cleaning: add HT to tank while filling with warm to hot water @ 1:500

Medium Soil- Encrusted dirt, oil, etc: Add HT to tank while filling with warm to hot water @ 1:250

Heavy Soil- Heavily encrusted oils, dirt, soils, ground in: add HT @ 1:125. Apply at two passes fully scrubbing on heavy pressure.

WEAR GLOVES AND GOGGLES, use care when using this and all chemicals, AND KEEP OUT OF REACH OF CHILDREN.

To be used in industrial settings only by trained personnel.

FOR ADDITIONAL PRECAUTIONS SEE MSDS.

SPECIFICATIONS

Specific gravity1.05	Flash point none	Health0
Density12.65#/gal.	water solubilitycomplete	Flammability0
Boiling point near 212F	color clear	Reactivity0
pH9.5-+.5		Pers. Prot. 1

BENEFITS

User and environment friendly, economical, rinses fast with no soapy residue.
